

HIS VISION MISSION PROJECT (2018)

HELPING PEOPLE EMERGE FROM DARKNESS TO LIGHT, FROM
IGNORANCE TO KNOWLEDGE, TO GAIN UNDERSTANDING AND
WISDOM.

- The bore hole which was constructed within five (5) days will help members and people living around Tarkwa and its environs to have access to good drinking water and for other purposes
- The bore hole forms part of one of the His Vision Mission community development project for the year 2017 – 2019.
- We are planning to build the next bore holes in the Volta and the Northern Region of Ghana.

PRAYING FOR SUCCESSFUL WATER DRILL

The construction cost is about GH¢15,000 cedis; This bore hole project forms part of His Vision Mission dream of ensuring that members and residents in part of the Tarkwa Nsueam community where there is water crisis have access to clean water .

Bore Hole Live Span

- The Drilling expert said the bore hole would last for 10 to 15 years after which maintenance and repair works will have to be done.

Sand Layers

- From the top soil to the end of the drilling, approximately 90meters.

Successful Water Drill
